

Rest Hours Module Issues

1. The rest hour record shows a total of 8 crew members on board, which is correct. However, when the crew rest hour record is filled in, the record sheet displays only one crew member and hides the other crew members.

Page Size: 20 1 to 1 of 1 Page 1 of 1

2. When the record screen is opened for the first time, it should display “Plan” in all the left-side columns, and the toggle on the top right should be set to “Rec.” However, currently the screen shows “Rec” in all the left-side columns and the toggle on the right side is set to “Plan.”

3. When a crew member is assigned a fixed task in the Plan menu, it is reflected in the Record submenu. In the Record sheet, the toggle at the top right should be set to “Record” by default instead of “Plan.”

Currently, if I click the “Rec” tab on the extreme left from the Plan menu, it can automatically change back to “Plan” for any date I click. The Plan option on the extreme left should only change manually. By default, it should remain set to “Record.”

- 4 In one month, a crew member can have only one NC. If one NC is already displayed, there should not be any additional predicted NC — only a violation, if applicable. Currently, one NC is displayed and, for the same crew and same month, another predicted NC is also being shown.
